Drinking Fountain With Bottle Filler

Product Code: DFBF

Combined Drinking Fountain With Integral Water Bottle Filler

Product Code DFBF

The Washware Essentials stainless steel drinking fountain with built-in bottle filling station has been designed with both functionality and safety in mind This high-quality stainless steel drinking fountain offers a convenient solution for hydration. Featuring a built-in water bottle filling station, it is available in both adult and junior height options to cater to all users. The sleek, matt-polished finish ensures durability, while the WRAS approved taps and water fittings provide reliable and efficient performance whilst meeting water regulations. Ideal for a variety of settings such as schools, this drinking fountain . bottle filler encourages the reduction of plastic waste by facilitating the refilling of water bottles.

- Stainless steel drinking fountain with built in water bottle filling station.
- Available in adult and junior height.
- Available as a free standing pedestal unit by adding a cover panel.
- Manufactured from stainless steel with a matt polished finish.
- WRAS approved drinking fountain bubbler tap.
- WRAS approved press button bottle filling tap.
- The drinking fountain with bottle filler has radius front corners to ensure there are no sharp edges or corners for safety.
- The bottle filler is recessed into the unit to prevent vandalism and damage usually associated with swan neck bottle fillers.
- The recessed bottle filler incorporates a push button tap and has an opening sized to take all common 0.5, 0.75, and 1 litre water bottles.
- Floor and wall mounting points with a full adult height undershroud to conceal all plumbing.
- Complete with two 32mm waste fittings with flexible waste pipes joined with a T piece to leave a single outlet.
- 1/2 inch threaded connections on both the drinking fountain bubbler and bottle filling tap.
- Lockable left hand side door for access to the plumbing connections and fixing points.
- Large rear opening to facilitate water supply pipes and waste connections.
- With increased coverage on plastic waste we can help by encouraging the refilling of plastic bottles.
- Recommended for many applications including schools.
- To ensure the proper functioning and longevity of this unit, a Y-strainer must be installed as part of the water supply system. The Y-strainer is essential for protecting the internal components and maintaining the correct flow characteristics of the tap. Failure to install a Y-strainer will result in the warranty being void.

Size

- 900mm high Adult (760mm - Junior).
