Water Bottle Filling Trough - Double (Non-Chilled)

Product Code: MBFT-2

Two-User Wall-Mounted Bottle Filling Trough

Product Code MBFT-2

A dual-station hydration unit built for efficiency, durability, and sustainability. Perfect for busy environments where quick, convenient bottle refilling is essential.

Our two-user wall-mounted bottle filling trough provides double the capacity of the single model while maintaining the same high standards of hygiene, durability, and water efficiency. Manufactured from heavy-duty stainless steel with a low-maintenance brushed satin finish, it delivers long-lasting performance in high-demand settings such as schools, fitness centres, transport hubs, and workplace campuses.

Dual Filling Points for High-Traffic Areas

The two user stations allow simultaneous bottle refilling, reducing queues and improving flow during peak periods. Each filling point is fitted with an easy-operated on/off push-button tap, providing precise control over water usage. This manual shut-off design offers several benefits:

- Eliminates excess water run-on common with timed-flow taps.
- Conserves water and reduces utility costs.
- Minimises splashing and surface mess.
- Enhances user control and overall efficiency.

Eco-Friendly Hydration That Encourages Reuse

The rise in reusable bottle use makes dedicated refill stations more important than ever. By adding this double filling trough, your organisation actively contributes to:

- Lowering single-use plastic consumption
- Reducing landfill waste
- Supporting sustainability, ESG, and environmental policy targets
- Its design encourages positive, eco-conscious habits across your visitor and user community.

Built for Real-World Conditions

This model is designed for easy installation in a range of settings, offering:

- Wall-mounted space efficiency
- Fast-draining waste outlets
- Suitability for indoor or sheltered outdoor areas
- Adjustable installation heights to meet accessibility requirements
- The dual-station setup is a practical solution for locations with high footfall, offering twice the capacity without taking up additional floor space.
- To ensure the proper functioning and longevity of this unit, a Y-strainer or filter must be installed as part of the water supply system. The Y-strainer / filter is essential for protecting the internal components and maintaining the correct flow characteristics of the tap. Failure to install a Y-strainer or filter will result in the warranty being void.

Durable, Reliable, and Low Maintenance

Manufactured from corrosion-resistant materials, this trough ensures hygienic operation and long-term reliability. The simple, open design makes cleaning quick and straightforward, even in demanding environments. Stainless steel grade 304 1.2mm thick.

Complete Your Hydration Network

If you require different configurations, we also provide:

Single User Bottle Filling Trough.
Triple User Bottle Filling Troughs.

Size

- 275mm in length.
- 243mm front to back.
- 445mm high.

Included

- 38mm flush grated waste fitting.
- Hinged grating to help prevent splashing and aid cleaning.
- Two WRAS approved on / off push button tap with brass backnuts.

Delivery

- In stock usually 1 to 2 working days.
