Commercial Wash Trough With Press Button Taps

Product Code: WT-PB

Stainless Steel Wash Trough with Press Button Time-Flow Taps – Bundle Deal

Product Code WT-PB

The WT-PB is a complete stainless steel hand washing trough package supplied with a press button time-flow tap for each user position. Designed for busy commercial, educational and workplace washrooms, the bundle provides a straightforward multi-user handwashing solution while the self-closing taps help control water use by automatically shutting off after each activation.

Available in three standard lengths for 3–4 users, the trough is supplied ready-drilled for the included taps and comes complete with a central 38mm chrome-plated domed waste fitting and integral wall-fixing brackets. The wash troughs and taps are held in stock for fast UK delivery.

Key Features

- Complete stainless steel wash trough and press button tap bundle.
- Supplied with one non-concussive time-flow tap per user.
- Approximately 7-second timed flow per activation.
- 3.8 litres per minute regulated tap flow rate.
- Self-closing operation helps reduce unnecessary water use.
- 442mm projection from the wall.
- Three standard lengths for 3–4 users.
- Trough supplied ready-drilled for the included taps.
- Supplied with central 38mm chrome-plated domed waste fitting.
- Integral wall-fixing brackets.
- Suitable for wall-mounted installation.
- Designed for schools, workplaces, factories, commercial washrooms and other high-use environments.
- Troughs and taps held in stock for fast UK delivery.
- Special bundle pricing while stocks last.

Sizes & Number of Users

- 1600mm – 3 users / 3 press button taps
- 1800mm – 3 users / 3 press button taps
- 2400mm – 4 users / 4 press button taps

Projection: 442mm front to back
Bowl depth: 181mm
Rear upstand: 30mm

Each size is supplied with the appropriate number of press button time-flow taps for the stated number of users.

Press Button Time-Flow Taps Included

The WT-PB bundle includes one press button non-concussive time-flow tap for each handwashing position.

Pressing the button starts the water flow, which automatically shuts off after approximately **7 seconds**. Each tap incorporates **3.8 litres per minute** flow regulation, helping control water consumption in busy communal washrooms.

Time-flow operation also prevents taps being accidentally left running, making the WT-PB particularly suitable for high-use and unsupervised washroom environments.

Bundle Deal

Purchasing the wash trough and press button taps together provides a simple way to specify a complete multi-user handwashing station without having to select compatible taps separately.

The package includes:

- Stainless steel wash trough.
- One press button time-flow tap per user.
- 38mm chrome-plated domed central waste fitting.
- Integral wall-fixing brackets.

The trough is supplied ready-drilled for the included taps, simplifying product selection and installation.

This product is offered at a special bundle price while stocks last.

Y-Strainer Requirement

A suitable Y-strainer must be installed in the water supply to protect the internal components of the time-flow taps from debris and contamination within the pipework.

Installation of a Y-strainer is required for the correct operation and longevity of the taps.

Failure to install a suitable Y-strainer will void the warranty on the taps.

Y-strainer and double check valve assemblies are available separately.

Delivery

In stock – usually delivered within 1–2 working days.

The standard WT-PB wash troughs and press button taps are held in stock for fast UK delivery.

Optional Extras

- Stainless steel front support legs.
- Y-strainer / double check valve assembly.
- 38mm plastic bottle trap.
- TMV3 thermostatic mixing valves.
- Chrome-plated brass bottle trap with chrome waste pipe and flange.
- Stainless steel bottle trap cover.
- Stainless steel wall-mounted and deck-mounted soap dispensers.
- Stainless steel paper towel dispensers.

Water Temperature Control

Press button taps are commonly supplied with cold or pre-mixed water.

Where temperature-controlled warm water is required, a suitable thermostatic mixing valve can be incorporated into the water supply to provide pre-mixed water to each tap.

TMV3 thermostatic mixing valves are available separately where required by the installation or project specification.

Cleaning & Maintenance

Clean the stainless steel trough regularly using warm soapy water or a mild detergent. Avoid bleach, chloride-based cleaners, steel wool and other aggressive or abrasive cleaning products that may cause staining or damage to the stainless steel surface.

Chrome-plated taps should be cleaned using a mild non-abrasive cleaner and soft cloth to help protect the plated finish.

The water supply and strainers should be maintained appropriately to prevent debris reaching the internal tap mechanisms.

For full stainless steel care instructions, see our Stainless Steel Cleaning Guide.
