Water Cooler With Bottle Filler - Accessible Model

Product Code: WCBF

Wall-Mounted Stainless Steel DDA Accessible Water Cooler With Sensor Bottle Filler

Product Code: WCBF

Inclusive, High-Capacity Chilled Drinking Water Station. The WCBF wall-mounted DDA accessible water cooler is a robust, commercial-grade hydration unit engineered for education, fitness, and workplace environments. Manufactured from premium grade 304 stainless steel, it offers exceptional durability, easy cleaning and long service life. The system delivers up to 30 litres of chilled water per hour, making it ideal for busy public areas.

This combination model features an overhead, sensor-operated bottle filling module, positioned directly above the water cooler. The automatic bottle filler delivers fast, touch-free operation and uses the cooler's chilled water supply for safe, refreshing hydration with minimal user contact.

Designed to support wheelchair users as well as standing users, the unit meets modern accessibility requirements while providing a practical, efficient and hygienic drinking solution for both point of use drinking fountain water and re-useable water bottle refilling.

Key Features & Advantages

- DDA-compliant layout, ensuring comfortable access for wheelchair users and able-bodied individuals.
- Brushed 304 stainless steel construction for strength, corrosion resistance and easy maintenance.
- Touch-free bottle filling station mounted above the cooler, activated by an infrared sensor for hygienic, hands-free use.
- Stainless steel backsplash to bottle filler.
- 3.79 litre per minute bottle filling rate.
- High chilled-water output: up to 30 L/hr (cooling 26.7°C water down to approximately 10°C).
- Anti-microbial push-button bubbler control for standard drinking fountain use.
- Integrated leak-detection shut-off valve within the chiller system for enhanced safety.
- Insulated evaporator for improved energy efficiency and stable cooling performance.
- Reliable mains-fed design, ensuring continuous supply without the need for bottle changes.
- CE certified, meeting recognised quality and safety standards.
- Adjustable thermostat and R-134a refrigerant for precise cooling control.

Supplied With

- Anti-microbial bubbler valve with flexible, non-splash guard.
- Pre-installed plumbing including Y-strainer and flow regulator.
- 32mm waste outlet connection.
- Pre-wired electrical lead with plug, suitable for a standard 13A socket for water cooler.
- Pre-wired transformer for bottle filling unit.

Best Suited For

- This accessible chilled water station with bottle filler is ideal for:
- Schools, colleges and universities
- Gyms, fitness centres and leisure facilities
- Industrial premises including factories and warehouses
- Offices and commercial buildings
- Any indoor area requiring inclusive, high-traffic hydration points
