Drinking Water Bottle Filling Trough - Single (Non-Chilled)

Product Code: MBFT-1

Single-User Wall-Mounted Bottle Filling Trough

Product Code MBFT-1

Washware Essentials single-user bottle filling trough offers a modern, hygienic, and eco-friendly hydration solution designed for schools, gyms, leisure centres, offices, and public facilities.

Our single-user wall-mounted bottle filling station provides a compact and efficient way for users to refill reusable bottles while helping your organisation reduce its environmental footprint. Constructed from 1.2mm thick grade 304 stainless steel, this robust unit is engineered for longevity in high-traffic environments and is exceptionally easy to clean and maintain. The elegant brushed satin finish not only enhances durability but also resists marks and wear from daily use.

Efficient Water Delivery – With On/Off Tap for Reduced Waste

Unlike traditional timed-flow taps that continue running after use, this model features an on/off push-button tap, giving users full control over water flow. This helps to:

- Prevent unnecessary water wastage.
- Save operational costs on water usage.
- Provide a more responsive and user-friendly filling experience.

The trough includes a 38mm waste outlet to ensure fast, efficient drainage, making installation straightforward for both indoor and sheltered outdoor locations.

Promoting a Greener, More Sustainable Environment

- Switching to bottle-filling stations is one of the simplest ways to encourage environmental responsibility. By offering a dedicated refilling point, your facility can help:
- Reduce reliance on single-use plastic bottles.
- Lower waste-disposal volumes.
- Support sustainability initiatives and eco-accreditation targets.
- Reusable bottle filling dramatically cuts plastic consumption while providing clean, accessible drinking water to staff, students, and visitors.

Designed for Versatility and Accessibility

The slim, wall-mounted configuration saves valuable floor space and can be installed at a variety of heights to meet accessibility requirements, including wheelchair-friendly setups. Its minimalist profile blends seamlessly into educational, healthcare, retail, and commercial interiors.

A Practical, Cost-Effective Hydration Solution

With its durable construction, user-controlled tap, and low-maintenance design, this single-user trough offers exceptional long-term value. It provides a clean, quick, and sustainable way for people to stay hydrated—making it an excellent addition to any environmentally conscious facility.

Looking for More Capacity?

For larger organisations or high-traffic areas, explore our:

Double Bottle Filling Trough.
Triple Bottle Filling Trough.

Size

- 275mm in length.
- 243mm front to back.
- 445mm high.

Included

- 38mm flush grated waste fitting.
- Hinged grating to help prevent splashing and aid cleaning.
- WRAS approved on / off push button tap with brass backnut.
- To ensure the proper functioning and longevity of this unit, a Y-strainer or filter must be installed as part of the water supply system. The Y-strainer / filter is essential for protecting the internal components and maintaining the correct flow characteristics of the tap. Failure to install a Y-strainer or filter will result in the warranty being void.

Delivery

- In stock usually 1 to 2 working days.
