

Accessible Drinking Fountain With Bottle Filler - (Non Chilled)

Product Code: ACC-DFBF

Accessible Drinking Fountain With Sensor Bottle Filler (non chilled)

Product Code: ACC-DFBF

The ACC-DFBF wall-mounted DDA accessible non chilled drinking fountain and bottle filler is a robust, commercial-grade hydration station engineered for education, fitness, and workplace environments. Manufactured from premium grade 304 stainless steel, it offers exceptional durability, easy cleaning and long service life. This non chilled version offers a cost saving over our chilled water versions.

This combined model features an overhead, sensor-operated bottle filling module, positioned directly above the drinking fountain. The automatic bottle filler delivers fast, touch-free operation and uses the mains water supply for safe, refreshing hydration with minimal user contact.

Designed to support wheelchair users as well as standing users, the unit meets modern accessibility requirements while providing a practical, efficient and hygienic drinking solution for both point of use drinking fountain water and re-useable water bottle refilling.

Key Features & Advantages

- DDA-compliant layout, ensuring comfortable access for wheelchair users and able-bodied individuals.
- Brushed 304 stainless steel construction for strength, corrosion resistance and easy maintenance.
- Touch-free bottle filling station mounted above the cooler, activated by an infrared sensor for hygienic, hands-free use.
- Stainless steel backsplash to bottle filler.
- 3.79 litre per minute bottle filling rate.
- Anti-microbial push-button bubbler control for standard drinking fountain use.
- Reliable mains-fed design, ensuring continuous supply without the need for bottle changes.
- **Please note this is a non chilled water version using unchilled mains water.**

Supplied With

- Anti-microbial bubbler valve with flexible, non-splash guard.
- Pre-installed plumbing including Y-strainer and flow regulator.
- 32mm waste outlet connection.
- Pre-wired transformer for bottle filling unit.
