Top Entry 1200mm Combined Sluice Sink and Sink Bowl

Product Code: H-DUHS-12

1200mm Combined Sluice Sink (Slop Hopper) with Sink Bowl – Top Entry Flushpipe for Exposed Cistern

Product Code H-DUHS-12

The 1200mm combined sluice hopper, and sink provides a practical and hygienic solution for healthcare, clinical and care environments where efficient waste disposal and handwashing facilities are required within a compact footprint. Designed for use in modern sluice rooms, this all-in-one unit combines a flushing slop hopper and stainless steel sink bowl in a robust wall-mounted assembly.

Designed for tighter spaces where standard 1600mm long units are too big to fit in.

Available from stock in both left-hand and right-hand configurations, the unit can be specified to suit room layouts and workflow requirements. This version is supplied with a top-entry flushpipe connection for use with an exposed cistern, complete with a stainless steel flushpipe.

Manufactured from high-quality grade 304 stainless steel with a satin polished finish, the unit features a pressed worktop construction that minimises joints and welds, helping to improve infection control and simplify cleaning. The design complies with the requirements of HBN 00-10 Part C: Sanitaryware Assemblies, making it suitable for healthcare applications where hygiene and durability are essential.

Key Features

- 1200mm wall-mounted combined slop hopper, and sink unit.
- Available from stock in both left-hand and right-hand configurations. (Handed by sluice sink as facing).
- Top-entry flushpipe connection for exposed cistern installations.
- Manufactured from grade 304 stainless steel with a satin polished finish.
- Pressed top construction reduces seams and welds for improved hygiene.
- Integral anti-drip edge and downward returns on all sides.
- Supplied with wall fixing brackets as standard.
- Designed in accordance with HBN 00-10 Part C requirements.
- Suitable for hospitals, care homes, healthcare facilities and clinical environments.

Slop Hopper

- Full flushing rim for effective and hygienic cleansing.
- Top-entry flushpipe connection supplied with stainless steel downpipe.
- 110mm plain spigot outlet.
- Optional polypropylene P-trap or S-trap available.

Sink Bowl

- Stainless steel sink bowl with deep pressed construction.
- Supplied with a 38mm unslotted flush-grated waste fitting.
- No overflow for enhanced hygiene.
- Available with no tap holes as standard, with optional factory-prepared tap holes to suit selected fittings.

Cistern Options

The unit can be supplied with a choice of stainless steel manual cisterns or plastic cisterns with lever-operated flushing mechanisms.

Delivery

Standard stock models are typically available for delivery within 1 - 2 working days and are delivered on a pallet for safety.
