## INFORMATION

HI-MACS® is made from a blend of 75% natural minerals and pigments set in an acrylic polymer matrix which inhibits the growth of bacteria and mold.

HI-MACS® has an eco-friendly non-porous surface with high resistance to everyday stains, scratches and heat. Durability is similar to that of natural stone. It is a renewable material and can be recycled at the end of its lifespan.

Due to its superior quality and affordability HI-MACS® offers a better alternative than similar products such as other solid surfaces materials, plastic laminate, granite, synthetic stone and tile.

The solid surface wash troughs can also be manufactured in Corian material. The Corian solid surface material is manufactured by DuPont and is also a blend of natural minerals, pigments and acrylic polymer.
